Reverse Cycle Air Conditioning System

Product Description

The simpler the design, the smoother the air flow. This formula applies in the design and installation of ducting and componentry for Reverse Cycle Air Conditioning. By utilizing the exclusive range of Polyaire Multi Function Fittings, you can reduce the amount of fittings normally requested - resulting in improved efficiency. And the new Polyaire Motorised Damper not only allows you to control individual rooms at the flick of a switch, it does so with more efficiency than other types on the market.
