

Ducted Air Conditioning Made Better...

POLYAIRE™ is one of the largest manufacturers of flexible ducts in the southern hemisphere, our metallized core and Firebreak flexible ducts are made from very high quality raw materials and meet all the exacting standards relating to fire safety.

Polyaire™ Firebreak Duct is available in the following diameters:

Ex Stock	Made to order
4" or 100 mm	16" or 400 mm
6" or 150 mm	18" or 450 mm
8" or 200 mm	20" or 500 mm
10" or 250 mm	22" or 550 mm

12" or 300 mm 14" or 350 mm

Standard duct length: 10 meters.
Other lengths are available on request.

Insulation: We use high quality Fibreglass or Glass wools for the insulating of our ducts insulation.

Densities available:

(1" 1lb/m2)	25mm	-	16kg/m3
(1" 2lb/m2)	25mm	-	32kg/m3
(2" 1lb/m2)	50mm	-	16kg/m3
(2" 2lb/m2)	50mm	-	32kg/m3

These ducts meet the Australian standard **AS/NZS4254** and have obtained the **Malaysian Fire and Rescue Department approval** with **spread of flame : "O"**, Standards **BS476 Part 6 and Part 7**.

Our various designs of Air diffusers are as printed on our brochure. These high quality square and round diffuser designs are made for simple installation, can be easily maintained and are able to be applied in any buildings for air conditioning outlets.

Pricing of **Polyaire™** products are very competitive with on time deliveries assured.

The technical backing of the **Polyaire™** Research and Development department ensures that we are always at the cutting edge of the industry.
